Why settle for less when you can have the strongest disk encryption product in the industry?

International Reputation:

SecureDoc's customer install base with Fortune 1000 companies and governments worldwide speaks volumes about our highest standard in security. Pioneer in the Disk Encryption technology, WinMagic's SecureDoc has achieved:

- Common Criteria validation.
- First AES validation from NIST.
- First and only FIPS 140-1 Level 2 certification.
- The ONLY disk encryption (FORTEZZA version) certified by the NSA for SECRET data for US Government agencies.
- Chosen for the Support of HSPD-12 initiative by US State Department and Homeland Security.

Advanced Encryption Features:

In addition to security, SecureDoc's UNIQUE FEATURES make it the most versatile disk encryption. SecureDoc Enterprise Edition is the only one:

- Designed/ architecture/ built based on open standards such as PKCS#11.
- Supporting a wide range of smartcards, USB tokens and popular PublicKey Infrastructures (PKI).
- Enterprise deployment with remote installation, password recovery without vulnerability of "Master Password".
- Key labeling concept enabling flexible sharing of encrypted files, disk, removable media.

"As a world-recognized think tank of security experts providing consulting, training, and briefings to highly-prestigious corporations and government agencies around the world, including Amazon, Microsoft, and the National Security Agency, Black Hat is in a unique position to evaluate all security solutions available," commented Jeff Moss, Founder & CEO, Black Hat. "Entrusted with highly-sensitive customer information, Black Hat selected WinMagic's SecureDoc full-disk encryption to ensure all data is protected on its windows-based systems."

Jeff Moss, Founder & CEO, Black Hat

Enterprise / Laptop Edition

Provides full disk encryption to protect sensitive information stored on laptops, desktops and PDAs. By offering integration with popular tokens and PKI at pre-boot time (after bios POST but before the OS loads) with dual and triple factor authentication (password/token/ biometrics), SecureDoc provides the ultimate security and flexibility in data protection.

Mobile / PDA Edition

WinMagic's SecureDoc Mobile Edition is the solution enabling both mobility and peace of mind knowing your data is protected at all times and places. It provides strong security through solid encryption commencing at pre-boot, backed by the highest level of certifications in the industry. The support of numerous removable storage media like flash cards and micro-drives as well as the PDA's system memory, presents a complete, cost-effective solution. SecureDoc's uniform platform allows the integration of all your business devices and is ready for future needs even before they occur. The transparent and automatic encryption of internal files, databases and memory cards, with no degradation in performance, makes SecureDoc powerful, user friendly and indispensable for the protection of sensitive data on the go.

About WinMagic Inc.

About WinMagic Inc.

WinMagic Inc. develops disk encryption software. Its SecureDoc line of products ensures protection of sensitive information stored on desktops and laptops by employing authentication from password to hardware token, biometrics, and PKI commencing right at preboot time. WinMagic's award winning products fulfill the requirements of even the most security conscious users by focusing on concrete security features, nevertheless still offering unparalleled flexibility. Utilizing Public Key Cryptographic Standards PKCS-11 from ground up for extreme adaptability, the SecureDoc line has earned an impressive list of validations including NIST Cryptographic Module Validation, FIPS 140-1 Level 2, FIPS 140-2 Level 1 & 2, and is scheduled to achieve the Common Criteria Evaluation Assurance Level 4 (EAL-4) certification by Q4 2006.

WinMagic Inc. is a Canadian company based out of Mississauga, Ontario. For more information concerning its products or services, please visit www.winmagic.com or call 1-888-879-5879, or email info@winmagic.com.
